## CMT TRAY & SOLUTION

### #TEST FOR SUBCLINICAL MASTITIS:

To test on the presence of subclinical mastitis

- ◆ Flush the testing scale with clean water.
- ◆ Clean the udder and start milking all four teats. It is important not to use the first milk for the test.
- ◆ Keep the testing scale underneath the udder and milk two squirts from every teat in its own circle.
- ◆ Hold the testing scale sideways, so that only the required amount of milk stays behind.
- ◆ Put as much Kepro CMT solution as milk in each circle.
- ◆ Mix the Kepro CMT solution with the milk by swerving the scale for ten seconds.
- ◆ Start reading the test straight away. When you wait too long, the results are not reliable anymore.

### MASTITIS DETECTOR

**Item Code : AMD-1C/4C**
